

Optimization of exhaust system by numerical simulation: Rapid proto-typing of exhaust system

Collaboration with Bosch, since 2005

1st Step: Optimization of flow field

poor uniformity
 $\Delta T = 35 \text{ K}$

better uniformity
 $\Delta T = 25 \text{ K}$

good uniformity ✓
 $\Delta T = 10 \text{ K}$

pressure drop -16%

2nd Step: Optimization of injector position for Layout 3
